

## THE INSPIRATION

Inspired by the likes of Jules Verne, H. G. Wells, and the 2012 movie *Hugo*, we ran with the idea of society's power source as steam, gears, and old-time electric. We translated that into a tablescape rife with moveable elements, metal gears, machine parts, and a new view of the world. Soft, romantic swagging and Victorian florals are counterpoints to the hard lines of the copper urn, crystal charger plates, and bronze tumblers, all making for a whimsical, elegant wedding style.

## THE TEAM
